PROFILE

B.Eng graduate combining an engineering foundation with hands-on web development. I build full-stack web applications with React, Next.js, Node.js and MongoDB or Supabase, from database and API to interface, and I also make motion graphics and 3D architectural visuals. I work with clients directly. Open to client projects, full-stack roles and frontend contracts, including remote-first teams in Nigeria and globally.

WHAT I DO

Websites & web apps. Design, build and launch: online shops with Paystack and Monnify payments, booking, real-time features, admin dashboards, search-friendly fast pages.

Mobile apps. iPhone and Android apps, from screen designs to a version ready to publish.

Motion graphics. Product and brand animations, social cuts, title sequences and explainers.

3D architectural visuals. Realistic renders and interactive 360° tours of buildings and interiors.

TECHNICAL SKILLS

Languages & frameworks: JavaScript (ES6+), TypeScript, React, Next.js, Node.js, Express, HTML5, CSS3, Tailwind CSS

Data & APIs: MongoDB, Supabase (PostgreSQL), Prisma, REST APIs, GraphQL, WebSockets (Socket.IO)

Auth & security: JWT, NextAuth.js, bcrypt, OTP via email, role-based access control, session management

Payments & integrations: Paystack, Monnify, Cloudinary, Nodemailer, Resend, UploadThing, Twilio

Tools & platforms: Git, GitHub, Vite, Vercel, Render, MongoDB Atlas, Framer Motion, Three.js, Recharts

Engineering: Electrical circuit analysis, electronics systems, signal processing

SELECTED WEB PROJECTS

StoneChat — Real-Time Chat Application

2024 · stone-chatapp.vercel.app

React · TypeScript · Node.js / Express · MongoDB · Socket.IO · Cloudinary · JWT · Three.js — solo project

- Built WebSocket messaging with Socket.IO: live delivery, friend-request notifications, typing indicators and presence.
- JWT authentication with OTP password reset by email, role-based access control and idle session timeout.
- Stream-based Cloudinary uploads (images, video, documents) and an admin dashboard with MongoDB aggregation analytics.
- Three.js particle landing page; frontend on Vercel, backend on Render, MongoDB Atlas.

Skin Essential Plus — E-Commerce & Booking Platform

2025 · skinessentialplus.com

Next.js · TypeScript · Tailwind CSS · Supabase · Cloudinary · Framer Motion · Paystack · Monnify

- Online shop and appointment booking for an Ibadan spa and skincare brand, with a multi-step booking flow.
- Dual Paystack and Monnify payments, discount codes, cart, product management and order tracking on Supabase.

Eldorado Real Estate — Luxury Property Website

2025 · eldoradolmtd.com

Next.js · TypeScript · Tailwind CSS · Supabase · Resend · Framer Motion

- Website for luxury homes in Banana Island, Ikoyi, VI and Eko Atlantic: filterable project catalogue, galleries, maps and detail pages.
- Appointment booking and newsletter sign-up through Resend; Supabase-backed admin dashboard for enquiries and listings.

Leave Your Legacy — Online Store

2026 · leaveyourlegacyfit.com

- E-commerce storefront with a 3D hero, 360° product viewer, advanced filtering and a persistent cart drawer.

Avanti Ristorante — Restaurant Website 2026 · theavantirestaurant.com

- Animated site for an upscale Italian restaurant with a cinematic hero, searchable menu and validated online table reservations.

Birthday Surprise — Interactive Web Gift (personal project) 2025 · madeforozioyza.vercel.app

Next.js · TypeScript · Framer Motion · Tailwind CSS · Cloudinary

- Multi-screen interactive gift with a passcode gate, story chapters, photo gallery, music player and falling-petal effects; progress saved in localStorage.

Poolside Africa — Digital Finance Platform Contributor

React · Node.js · REST APIs

- Contributed frontend development to a fintech platform for community savings, crowdfunding and reward-based tools.
- Built responsive, accessible UI components and helped integrate REST APIs and state management across user flows.

MOTION GRAPHICS & 3D VISUALS

- **Motion:** Dortunez Atelier film; Salt & Sapphire vertical advert and solar explainer; cream product animation.
- **3D visuals (concept work):** Contemporary interior concept and one-bedroom apartment interior, both as interactive 360° tours.
- Videos and full project details: usmanogunnaike.vercel.app/work

EXPERIENCE

Software Development Intern — SQI College of ICT 2024 – 2025

- Built and maintained real-world web applications with modern JavaScript frameworks and tools.
- Worked with senior developers on full-stack projects, applying version control, code review and agile practice.
- Strengthened React, Node.js and MongoDB skills through structured mentorship and project delivery.

TRAINING

- Software Development Training, SQI College of ICT (2024–2025): full-stack web development, React, Next.js, Node.js, databases.
- Self-directed learning via MDN Web Docs, freeCodeCamp and building production applications.
