

USMAN OGUNNAIKE

Full-Stack JavaScript Developer | B.Eng Electrical & Electronics Engineering (2:1)

Lagos, Nigeria • +234 813 156 1562 • ogunnaikeusman17@gmail.com • LinkedIn • GitHub

PROFESSIONAL SUMMARY

Results-driven Full-Stack JavaScript developer and B.Eng graduate in Electrical & Electronics Engineering (Second Class Upper, 2:1) from Olabisi Onabanjo University. Combines a strong engineering foundation with hands-on experience building production-grade, real-time web applications using React, Next.js, Node.js, and MongoDB. Demonstrated ability to architect and ship complete products — from database design and RESTful APIs through to responsive, accessible user interfaces. Passionate about writing clean, scalable code and solving real-world problems with technology.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript (ES6+), TypeScript, React.js, Next.js 14/15, Node.js, Express.js, HTML5, CSS3, Tailwind CSS

Databases & APIs: MongoDB, Supabase (PostgreSQL), Prisma, REST APIs, GraphQL, WebSockets (Socket.IO)

Auth & Security: JWT Authentication, NextAuth.js, bcrypt, OTP via email, role-based access control, session management

Payments & Integrations: Paystack, Monnify, Cloudinary CDN, Nodemailer, Resend, UploadThing, Twilio

Tools & Platforms: Git, GitHub, Vite, Vercel, Render, MongoDB Atlas, Framer Motion, Three.js, Recharts

Engineering: Electrical circuit analysis, electronics systems, signal processing (B.Eng background)

PROJECTS

StoneChat — Real-Time Chat Application

[React 19 \(TypeScript\)](#) · [Node.js / Express 5](#) · [MongoDB](#) · [Socket.IO](#) · [Cloudinary](#) · [JWT](#) · [Tailwind CSS](#) · [Vite](#)

Live: [stone-chatapp.vercel.app](#)

- Engineered WebSocket-based communication using Socket.IO for live message delivery, friend request notifications, typing indicators, and user presence tracking.
- Implemented JWT authentication with OTP-based password reset via email (Nodemailer/Gmail), role-based access control, idle session timeout, and automatic token refresh.
- Integrated Cloudinary CDN for stream-based file uploads (images, video, documents) with zero server-side temp storage and inline preview.
- Built a dedicated admin dashboard with MongoDB aggregation pipelines powering real-time analytics — user growth charts, message trends, and 24-hour peak activity heatmaps.
- Designed an animated landing page with Three.js particle physics and Framer Motion transitions throughout the app UI.
- Deployed frontend on Vercel, backend on Render, with MongoDB Atlas as the cloud database; configured CORS, environment secrets, and uptime monitoring.

Skin Essential Plus — Full-Stack E-Commerce & Booking Platform

[Next.js 14](#) · [TypeScript](#) · [Tailwind CSS](#) · [Supabase](#) · [Cloudinary](#) · [Framer Motion](#)

Live: [skinessentialplus.com](#)

- Designed and developed a full e-commerce and appointment booking platform for a premium Lagos-based skincare brand.
- Built a multi-step checkout flow with dual payment gateway integration (Paystack and Monnify), supporting card payments and bank transfers in Nigerian Naira.
- Implemented a cart system with coupon/discount logic, product management, and order tracking using Supabase as the backend database.
- Integrated Cloudinary for optimised image delivery and built animated UI components using Framer Motion for a premium user experience.
- Created legal compliance pages (Privacy Policy, Terms & Conditions, Cookie Policy) and a complete appointment scheduling system.

Eldorado Real Estate — Full-Stack Luxury Property Platform

[Next.js 15](#) · [TypeScript](#) · [Tailwind CSS](#) · [Supabase](#) · [Resend](#) · [Framer Motion](#)

Live: [eldoradolmtd.com](#)

- Designed and developed a full-stack luxury real estate platform for a high-end Nigerian property company.

- Built a multi-page marketing and lead generation site with animated hero carousels, filterable project listings across residential, commercial, hospitality, and mixed-use categories, and detailed property pages with galleries, floor plans, and location maps.
- Integrated a Resend-powered email API for appointment booking and newsletter subscriptions.
- Built a secure admin dashboard for managing inquiries and property listings backed by Supabase.

Personalized Birthday Web Experience

[Next.js](#) · [TypeScript](#) · [Framer Motion](#) · [Tailwind CSS](#)

Live: [madeforozioyza.vercel.app](#)

- Built a fully bespoke, multi-screen interactive birthday gift web app featuring a secret-code gate, animated story-driven narrative with photos, and background music playback.
- Engineered falling petal particle effects and progress persistence via localStorage; deployed as a production web app.

Poolside Africa — Digital Finance Platform

[React](#) · [Node.js](#) · [REST APIs](#)

- Contributed frontend development to a fintech platform enabling community savings, crowdfunding, and reward-based financial tools aimed at underserved Nigerian communities.
- Developed responsive UI components with a focus on accessibility and intuitive UX for non-technical users.
- Collaborated on REST API integration and state management across complex user flows.

WORK EXPERIENCE

Software Development Intern | SQI College of ICT

2024 – 2025

- Built and maintained real-world web applications using modern JavaScript frameworks and tools.
- Collaborated with senior developers on full-stack projects, applying industry best practices in version control, code review, and agile workflows.
- Strengthened skills in React, Node.js, and MongoDB through structured mentorship and project delivery.

EDUCATION

B.Eng Electrical & Electronics Engineering

2018 – 2023

Olabisi Onabanjo University, Ago-Iwoye, Ogun State — Second Class Upper (2:1)

CERTIFICATIONS & TRAINING

- Software Development Training — SQI College of ICT (2024–2025): Full-stack web development, React, Next.js, Node.js, databases.
- Self-directed learning via MDN Web Docs, freeCodeCamp, and building production applications.
